

Manufacturing Edition

Innovation Without the Overhead

“Acumatica is the pulse of our company. The visibility we have has been the largest benefit...but we have a lot more opportunities ahead as we continue to uncover and explore more of Acumatica’s functionality.”

– Kimberly McElroy, Director of Operations, [Portacool](#)

Smarter Manufacturing Starts with Software That Grows as You Do

Acumatica is purpose-built for growing discrete and process manufacturers ready to move beyond the limits of entry-level accounting tools and outdated ERP systems. Whether you’re make-to-stock, make-to-order, batch, configure-to-order, or engineer-to-order, Acumatica adapts to your unique production and supply chain needs, without the limitations of entry-level systems or the rigidity of legacy applications.

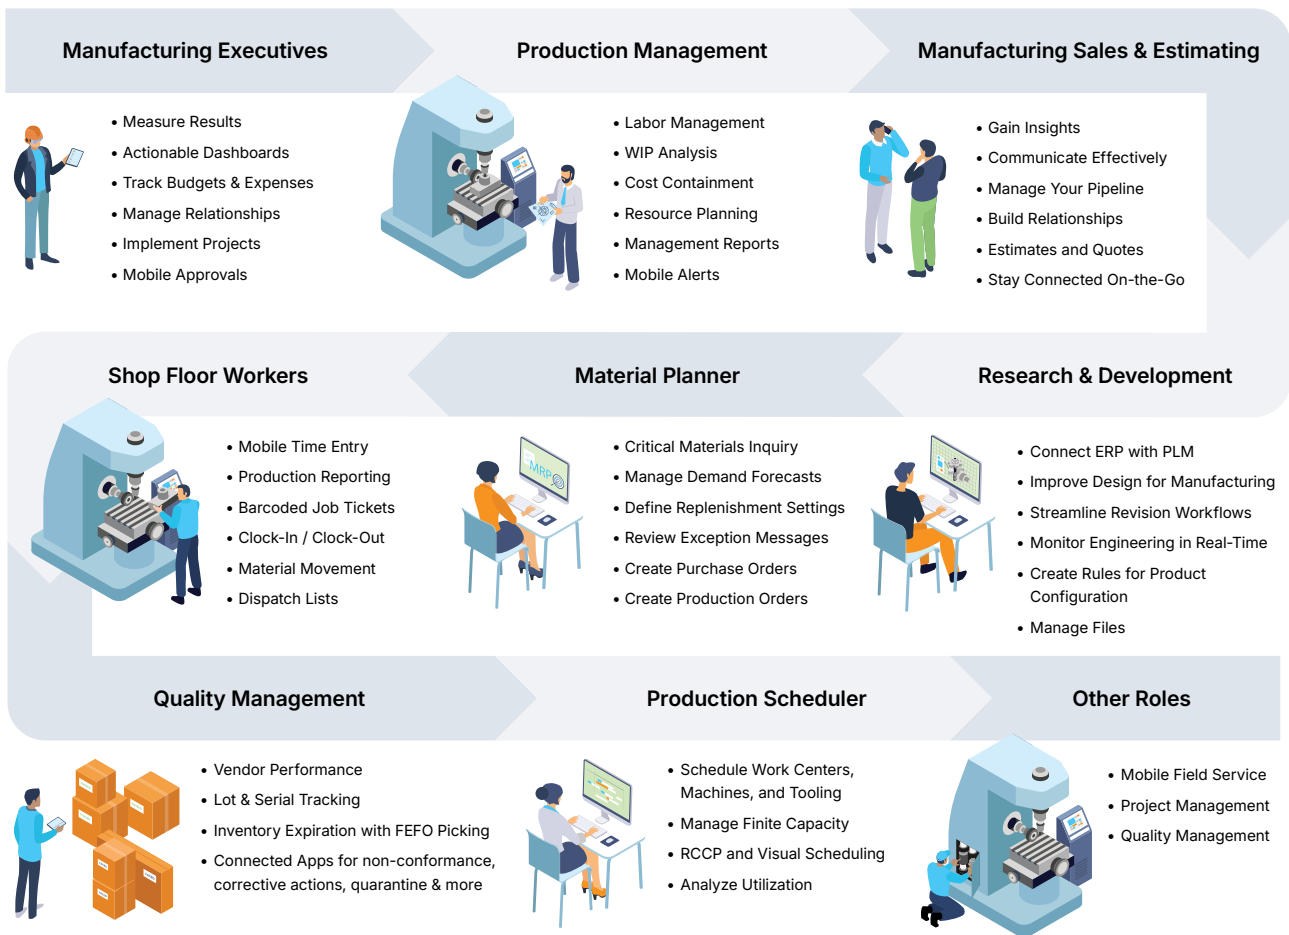

The connected platform delivers deep functionality across estimating, engineering, material planning, and scheduling, as well as robust inventory, order management, and best-in-class financials. Built-in tools for engineering change control, rules-based product configuration, and shop floor data collection eliminate the need for costly third-party add-ons. Meanwhile, advanced features such as quality management, demand forecasting, and CAD/PLM integration streamline operations.

Expand into new markets with connected B2B and D2C commerce. Deliver a world-class customer experience through native field service and embedded CRM. Acumatica’s intuitive interface, intelligent workflows, and flexible licensing empower teams with real-time insights for faster decisions and growth.

Empower Everyone with Role-Based Dashboards, Seamless Collaboration, and Intuitive Navigation

Acumatica's modern ERP applications streamline operations on a single, connected platform for employees to manage daily tasks and strategic goals. Improve client satisfaction and drive long-term growth with role-based dashboards, configurable workflows, and embedded AI.

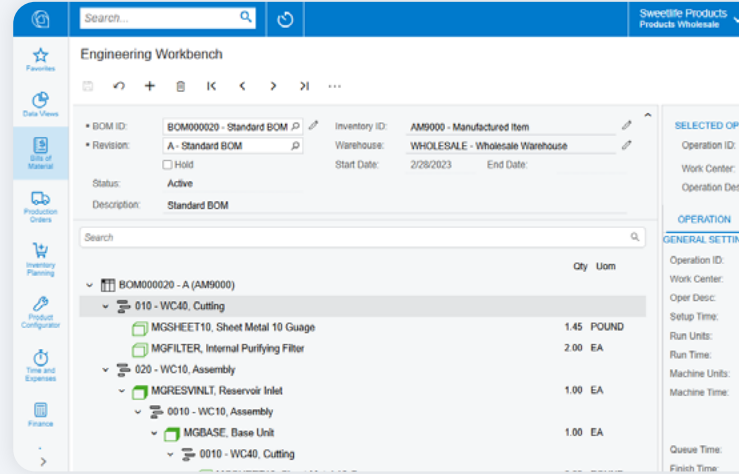

“With Acumatica, we can double the size of the business without doubling the space and the people because we have power in the information. We can work more logically, provide better service and save millions in labor by not having to double the staff size.”

– Ben Leinster, CEO, [AFFGroup](#)

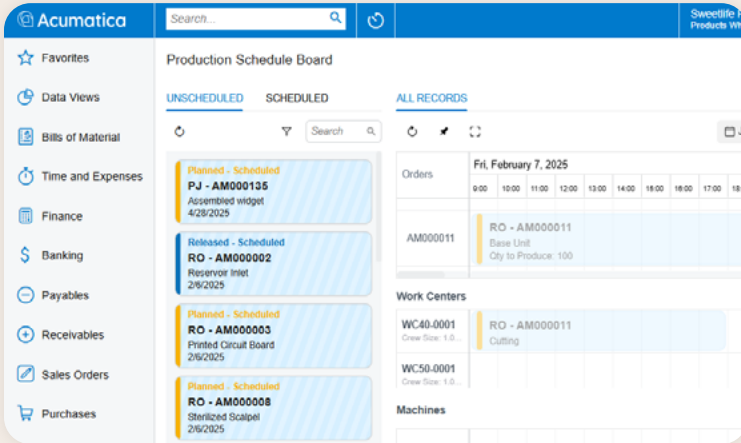

Product Definition

Define and manage complex products with precision using Acumatica's flexible product definition tools including data imports, rules-based product configuration, manufacturing estimates, and manual bill of material entry. Create accurate BOMs, routings, and cost structures to improve planning, reduce waste, and accelerate time to market. Seamless CAD and PLM integration ensures engineering and production stay aligned. Automate change control, streamline revisions, and gain real-time visibility to support smarter decisions and higher margins.

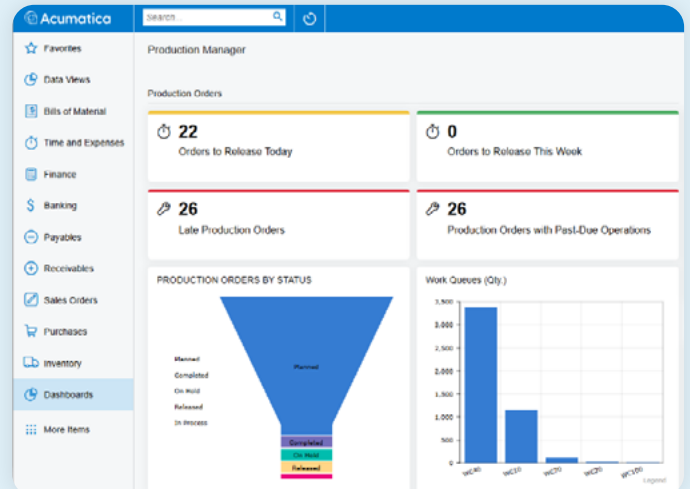

Planning and Scheduling

Identify critical materials and manage constraints with time-phased material planning and finite capacity scheduling. Align supply with demand, automate procurement, and optimize resources to reduce costs and WIP and free-up capital. Smarter forecasts improve purchasing and resource allocation, boosting throughput, minimizing downtime, and increasing profitability.

Production Management

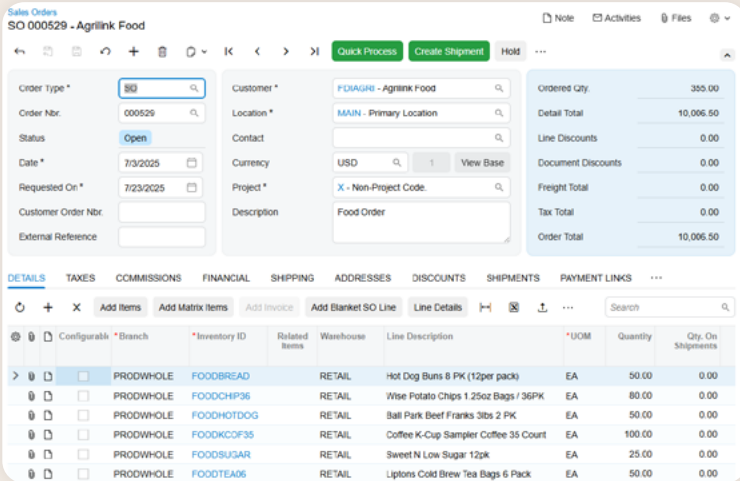

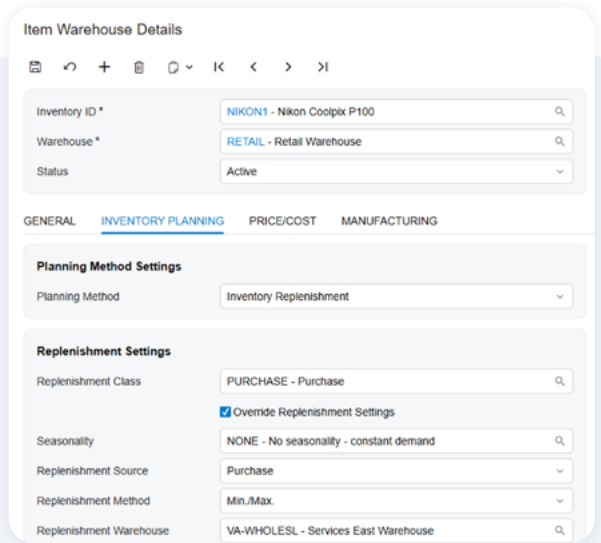

Acumatica's Production Management simplifies manufacturing with real-time WIP visibility, accurate material tracking, and streamlined labor reporting through mobile and barcode-enabled shop floor data collection. Capture every transaction as it happens—on the floor, in sequence or out. Analyze production performance with side-by-side views of standard vs. actual costs and quantities. Drill into variances, identify inefficiencies, and make faster, smarter decisions that protect margins and boost throughput.

Inventory Management

Gain complete visibility and control over raw materials, intermediate components, and finished goods. Track inventory in real-time to minimize shortages, prevent overproduction, and maintain smooth production line operations. Automate replenishment and manage material planning settings to align supply with demand. Support complex product families with matrix items based on size, style, color, and more. Streamline operations with kitting and disassembly, and ensure traceability with lot and serial number tracking. From the shop floor to final shipment, Acumatica helps manufacturers stay agile, efficient, and profitable.

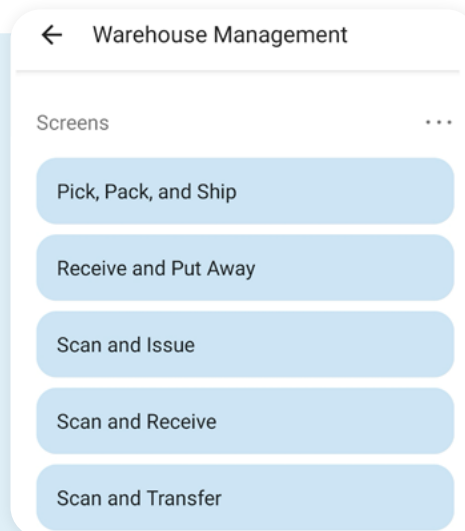

Order Management

Easily create, track, and approve purchase orders while maintaining clear visibility into costs and vendor commitments. Efficiently manage sales orders with flexible pricing, discounting, and order fulfillment tools that enhance customer satisfaction. With Acumatica, you can create production orders directly from sales orders in make-to-order and job shop environments, automate purchases for outside processes, and launch the rules-based product configurator from sales order entry to build personalized products.

Warehouse Management

Acumatica's warehouse management enhances efficiency with mobile access, barcoding, and automated workflows for picking, packing, and shipping. Real-time tracking, barcode scanning, and guided workflows speed up fulfillment while reducing errors. Seamless shipping integrations ensure fast order processing, keeping customers happy. Whether managing one warehouse or a complex network, Acumatica provides the agility and visibility to keep operations running smoothly.

CRM

Acumatica's CRM helps manufacturers streamline sales, automate marketing, and manage customer and supplier relationships with full visibility. Link manufacturing estimates to quotes and opportunities to accelerate sales for improved forecast accuracy. Track technical support and training requests to enhance service quality. With a 360-degree view of every interaction, manufacturers can align teams, personalize engagement, and build stronger, more profitable relationships.

Automate Production, Sales, and Procurement Workflows

Accelerate production and cash flow with automated quote-to-cash workflows that streamline quoting, approvals, invoicing, and collections. Gain real-time visibility into orders, inventory, and financials to improve speed and accuracy. Optimize procurement with time-phased planning, vendor requisitions, and workflows to reduce manual tasks. Automate the procure-to-pay process to align purchasing with production needs.

On the shop floor, embedded WMS with barcode scanning speeds production reporting and order fulfillment while reducing errors. With Acumatica, manufacturers gain the agility to scale, improve margins, and deliver faster, smarter service.

Last-Mile Features Designed for Your Industry

Acumatica supports a wide range of discrete and process manufacturing modes, enabling manufacturers to tailor workflows and automation to fit their operations, from complex product designs to high-volume production. The platform adapts to industry-specific needs like batch production and lot tracking for food and chemicals, job shop estimating, native field service for installation and repair, rules-based configuration for personalized products, and engineering change control for industrial equipment. Acumatica unifies production, inventory, sales, and fulfillment across teams and digital channels for real-time visibility and control.

Aerospace and Defense

aircraft parts, search and navigation equipment, weapons

Instruments and Medical Device

lab and medical equipment, photography, watches

Apparel and Jewelry

clothing, footwear, fabricing, luggage, rope, rings, necklaces

Non-Metallic Minerals

stone, clay, glass, concrete, tile, ready-mix, minerals

appliances, computers, lighting, batteries, components

Printing and Publishing

magazines, books, newspapers, maps, greeting cards

Fabricated Metals

hand tools, hardware, fasteners, springs, cookware

Sporting Goods and Toys

sports equipment, hunting and fishing, toys, games, dolls

Food and Beverage

meat, dairy, fruit, vegetable, confectionary, beer, wine

Wood and Lumber

logging, sawmills, millwork, cabinets, pre-fab buildings

Furniture and Home Goods

furniture, bedding, floor covering, pictures, home textiles

Other Manufacturing

musical instruments, signs, sewing, art supplies, brushes

Industrial Equipment

equipment for farming, manufacturing, construction, more

Non-Manufacturing Industries

agriculture, forestry, fishing, mining, distribution, more

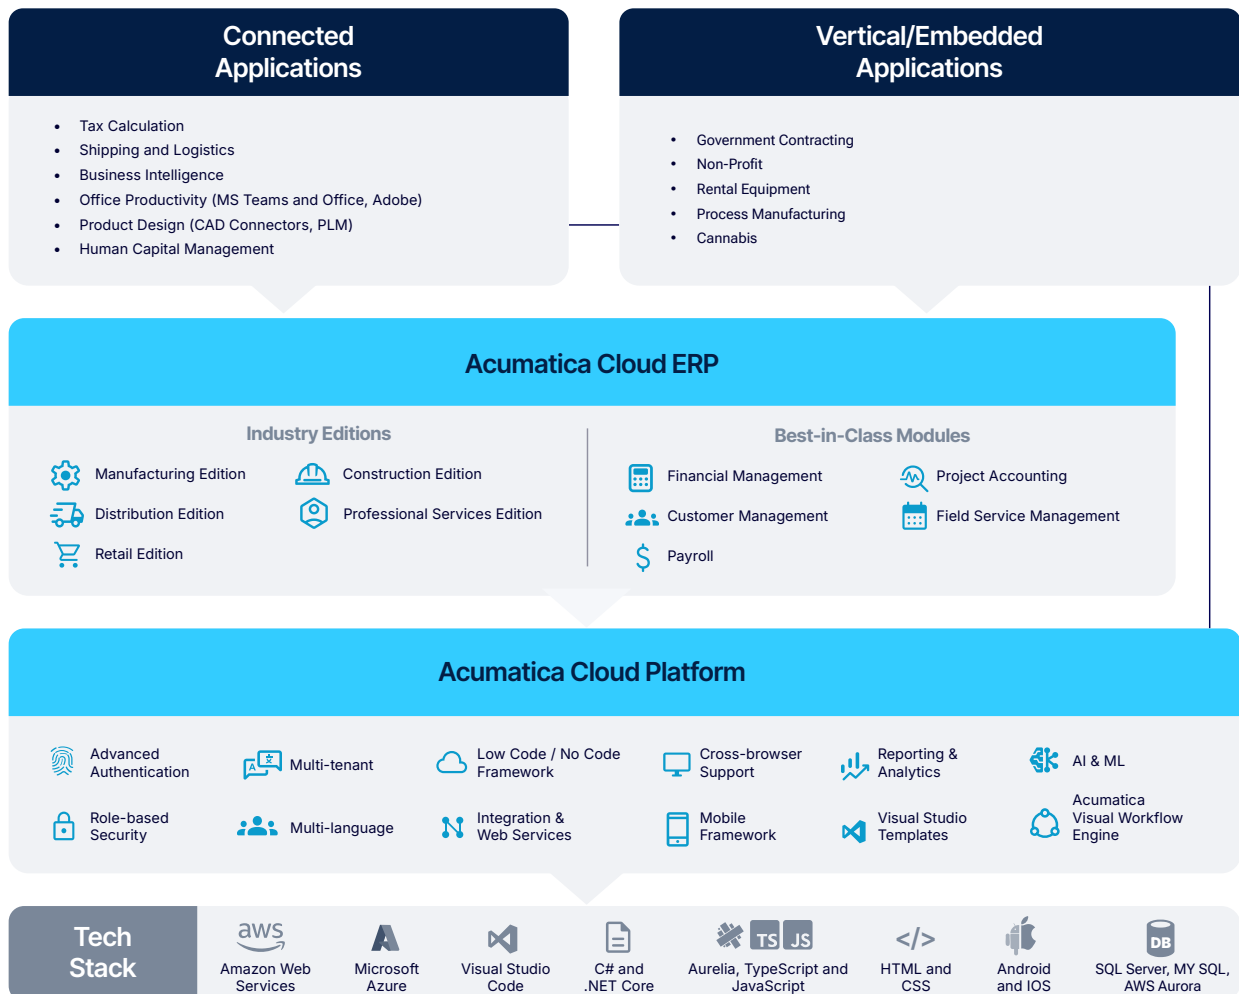

The Adaptable Acumatica Cloud ERP Platform

The Acumatica Cloud ERP platform is built on the world's best cloud and mobile technology, providing the tools business users need to reimagine an interconnected world.

The architectural framework and application development platform leverage new technologies with user-driven feedback, empowering business users to tailor the system with role-based security and low-code and no-code customization tools for a personalized ERP experience. Developers can easily customize and extend the application to meet unique business and industry requirements.

Acumatica allows users to modify workflows, rearrange screens, customize reports, build dashboards, and tailor the system without writing code. Transform your business, collaborate across departments, and prepare for growth with a business management platform that adapts to your evolving needs.

Manage your Entire Business with a Modern and Holistic ERP Solution Tailored for Every Need
